When is the completion date of your employees removing the food source?

The process for pest control is that 1) rodent identified 2) tenant removes all sources of food.

Again as EPA has been advised for months of this issue and I have not received anything in writing yet.

Keith send me your SOW. We can talk after 1:00 tomorrow

I will call the pest control contractor but i need a POC for tomorrow, and cubicle numbers where the issue is.

Nancy Sellers
